

emLine.....environmental software solutions

a world-class software suite.

emLine™ is a suite of enterprise software applications that support environmental, health and safety programs. These secure, browser-based EH&S applications are tailored to the needs of the customer and designed to improve decision making, reduce liability, streamline corporate communications, and enhance profitability.

emLine delivers bottom line results.

Developed by a team with more than a decade of experience in environment, health and safety software systems, the emLine suite of software solutions delivers immediate measurable results. Period.

Reduced Costs – emLine reduces costs by providing a universally available platform that standardizes and optimizes environmental data and programs management. emLine reduces manual labor, optimizes allocation of assets, decreases non-compliance costs and streamlines day-to-day decision making.

Improved Quality – emLine has been designed as an integrated subsystem to quality management programs. The emLine suite of solutions will help you to improve data quality and integrity, track compliance with quality programs (e.g. ISO 14000, ISO 9000, Six Sigma, etc.) and improve the quality of your decisions.

Reduced Environmental Liability – emLine reduces environmental liability by eliminating “islands” of data and improving the quality of information products for characterization and assessment of environmental liability. Integration of environmental themes within emLine provides a holistic view of environmental performance, positioning you to respond to environmental issues proactively and avoid new or additional liabilities.

immediate. measurable. results.

a complete EH&S software solution.

emLine is a comprehensive suite of software solutions that can be tailored to meet the precise needs of your EH&S operation.

Data Management

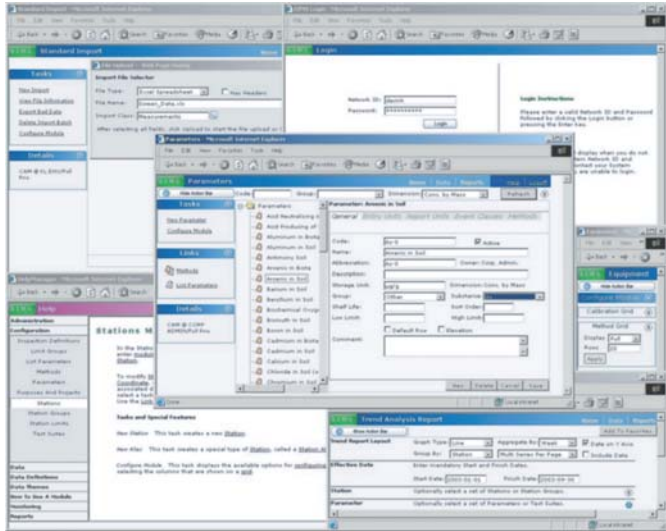

Create a centralized, standards-based repository for your environmental data.

Programs Management

Develop, communicate, monitor and manage activities, resourcing and schedules for your environmental programs.

Compliance Management

Monitor, analyze, report and correct noncompliance associated with regulatory, quality management or operational constraints.

Reporting and Analysis

Use emLine's powerful reporting and analysis features to quickly create information for decision making, performance evaluation and quality management.

Electronic Data Interchange

Exchange electronic data with your stakeholders, such as regulatory agencies, consultants and partners.

Radiation Safety & Personal Health

Capture, manage, analyze and report personal radiation exposure and health information for employees and contractors.

Integrated Laboratory Operations

Integrate the operations of internal laboratories with your environmental and health departments.
